

Research

- Remote sensing
- Geospatial data generation and management
- Terrain analysis and reasoning
- Terrain representation and visualization
- Spectral reflectance fluorescence/emissivity
- Civil works (surveying, mapping and navigation)

Systems

- Materiel acquisition
- Enterprise GIS
- Combat terrain information
- Imagery exploitation
- Tactical intelligence applications
- Rapid prototyping
- Advanced Concepts Technology Demonstrations
- Simulation-based acquisition

Operations

- Geospatial information and services
- Army geospatial/imagery requirements
- National and commercial imagery
- Urban studies
- Crisis support to military operations
- Mobility/countermobility information
- Water resource information
- Historical photo environmental analysis
- Military well-drilling support
